PROJECTS

- **Asp.Net based project (Restaurant Management Website)**

This website was made by use of C# with Asp.Net. The Software used for this was Visual Studio 15. MySQL, SQL server management studio is used as the backend for this website. By the help of this website one can do the online booking of food, table reservations, online payment, navigation through Google maps, etc. and the admin can manage the users, view orders, view feedbacks and also reply back to them and also update the menu card.

- **Core Java Based Project (Real Estate Management Application)**

This project is done on Eclipse with Java and MySQL was the database used for it. This is a desktop-based application which is used to manage the real estate work i.e. the adding, removing, displaying and updating the properties that the real estate owners has.

- **Ecommerce Shopping Web Application Using MERN STACK**

- Built a fully responsive dynamic MERN Stack web application to shop watches, sunglasses and bags.
- Technologies used:
 - Front-End: JavaScript, React.js, HTML, CSS.
 - Back-End technologies and Database: Node.js, Express.js and MongoDB.

Extra-Curricular Activities:

- Participated in Dance in school and college.
